

1090C CONCRETE REMOVER

SPECIALTIES FOR MAINTENANCE AND SANITATION SINCE 1947

KEEPS READY-MIX TRUCKS LIKE NEW

- brush on
- allow few minutes contact
- agitate if necessary
- rinse

BEFORE

AFTER

SAFE FOR PERSONNEL AND EQUIPMENT

FAST—Now, through modern research, those stubborn, hard to clean accumulations of concrete and cement dust are dissolved and rinsed away by this highly activated cleaner.

DOES NOT CONTAIN MURIATIC—SULFURIC—NITRIC ACID

PROTECTS—Foremost 1090C is a blended, mild acid detergent, buffered for maximum safety. Yet, recently developed activators give it unique penetrating and solvent properties that out-perform the old-fashioned, hazardous to use, mineral acids.

Designed for use on most painted ready-mix drums, signs, etc. Actually protects and tends to prevent corrosion of exposed unpainted metal surfaces.

HIGHLY EFFECTIVE FOR USE ON CONCRETE CONVEYORS

ECONOMICAL—Foremost 1090C is highly concentrated and can be diluted with water for individual job requirements.

Packed in 55 Gallon Drums

TECHNICAL DATA

FOREMOST 1090C CONCRETE REMOVER

Rev. 03-28-11

DESCRIPTION: Foremost 1090C Concrete Remover is a highly concentrated solution of a mild acid and emits no toxic odors.

APPLICATION: It is highly effective for cleaning and removing light to medium concrete and cement deposits from the barrels and chutes of ready-mix concrete trucks and other surfaces such as spreaders, etc. It is not recommended for use on truck cabs where maximum protection of paint is desired.

DIRECTIONS: Foremost 1090C Concrete Remover can be sprayed or mopped on or applied with a long handle brush or sponge.

IMPORTANT: Before cleaning, cool surfaces by flushing with water. Apply with a circular motion, agitating enough to loosen surface film. Allow the solution to remain on the surface approximately 10 to 15 minutes, agitate further if necessary, then hose off with water. It is recommended that only a small section be cleaned at one time before moving to the next area.

For removing stubborn deposits, use Foremost 1090C Concrete Remover without diluting. For lesser accumulations, dilute 1 part with 2 parts water and apply. Dilutions can be varied to meet specific conditions. It may be necessary to make more than one application. In some instances, hard or thick deposits may require mechanical removal in conjunction with Foremost 1090C Concrete Remover.

NOTE: Do not allow solutions to either dry or to remain on surfaces for excess periods of time. During hot weather it is best to perform cleaning in a shaded area to prevent rapid drying of cleaner and to provide greater protection to painted sections.

PRECAUTIONS: **KEEP OUT OF REACH OF CHILDREN.** Contains phosphoric acid. Causes skin irritation. Avoid contact with skin and eyes. In case of contact, flush skin and eyes with copious quantities of water for at least 15 minutes; for eyes, get medical attention. Do not use on chrome surfaces.

FACTS

1. Highly activated
2. Protects painted surfaces
3. Rinses freely
4. Protects unpainted surfaces
5. Versatile
6. Fast

BENEFITS

1. Will remove cement as fast as many of the more corrosive acids
2. The entire truck and machinery may be cleaned without harming the finish
3. Cement is readily rinsed away with water after treatment with Foremost 1090C
4. Will treat exposed ferrous surfaces to inhibit rusting
5. Excellent also for cleaning spreaders, masonry, walls, equipment, pallets, tools and forms
6. Specially developed activators give dissolving properties.
