

1199-ES NUT CASE

SPECIALTIES FOR MAINTENANCE AND SANITATION SINCE 1947

FREES NUTS, BOLTS AND FROZEN PARTS

NUT CASE IS MULTI -PURPOSE

LUBRICATES - Nut Case is a very good all purpose light duty lubricant. Eliminates squeaks and reduces friction.

PENETRATES - Powerful combination of penetrating agents, surfactants and active solvents penetrate rust, corrosion and oxidation.

CLEANS - Fast acting solvent agents clean treated surface.

PROTECT - Leaves behind a rust and corrosion resistant film.

- Frees Frozen Parts
- Instantly Loosens Rust Bond
- Lubricates as it Penetrates
- Leaves Rust Resistant Film
- Displaces Moisture

CONTAINS NO CFC'S OR OTHER OZONE
DEPLETING SUBSTANCES

Nonfood Compounds
Program Listed H2
Registration # 147500

RECOMMENDED FOR:

- Automotive
- Marine
- Maintenance
- Fleet
- Oil Service
- Machinist
- Road Dept.
- D.O.T.s

Net Wt. - 15 oz.

16 Doz. or
4/48 cases

PACKED -
8 Doz. or
2/48 cases

4 Doz. or
1/48 case

Also Packed In
Bulk 55 gallon Drums

TECHNICAL DATA

FOREMOST 1199-ES NUT CASE

Rev. 11-10-15

DESCRIPTION: A unique blend of solvent, dispersant, and penetrating ingredients composed of rust-preventive film-forming materials with excellent adhesion on metal surfaces. Distinctive characteristics include fingerprint-neutralizing, lubricating and water-displacing properties. The rust preventive film is so thin as to be nearly invisible. Build-up is so light that it can be applied periodically to protect the finished steel surface of machinery in service. Foremost 1199-ES Nut Case contains no 1, 1, 1-Trichloroethane, CFC's or other ozone-depleting substances.

APPLICATION: Recommended for all maintenance men, industrial maintenance, mechanics, machinists, pipefitters and plumbers as a penetrating oil to break up and free rusty bolts, nuts, valves and various types of fittings. Its water-displacing properties have also made it useful, when applied as a spray, for drying automotive wiring to eliminate electrical leakage caused by moisture. Since it affords excellent rust preventive protection, many uses for this material are found in these industries: shipping or storing machinery, farm implement parts, vehicles and military equipment.

DIRECTIONS: It is readily applied by spraying as needed and may be removed easily by means of a solvent whenever desired. After application, the volatile constituents evaporate, leaving a thin, tough film on the metal surfaces. Rust preventive gives maximum protection when applied only to clean surfaces. The surface does not have to be dry, since a water-displacing agent is present. For penetration, spray a liberal amount of Foremost 1199-ES Nut Case on the frozen part and wait approximately 1 to 2 minutes. Tap the treated part lightly, then loosen part gently.

PRECAUTIONS: **KEEP OUT OF REACH OF CHILDREN.** Contains petroleum distillates. May be harmful or fatal if swallowed. Do not take internally. Combustible liquid. Keep away from heat and open flame. Use with adequate ventilation. Avoid contact with eyes or skin.

FIRST AID: EYES: Flush with large amounts of water for at least 15 minutes and see a physician immediately if burning persists. **SKIN:** In case of contact, wash with soap or mild detergent and water. **INGESTION:** If breathing difficulties, dizziness or light-headedness occur, remove to fresh air. Before using this product read the Safety Data Sheet (SDS) for more detailed information regarding safe handling.
