

3008 FLOOR FINISH—BUFFABLE

SPECIALTIES FOR MAINTENANCE AND SANITATION SINCE 1947

Combines the durability, initial high gloss, and window glass clarity of modern polymer finishes...

With the ease of application, buffability and sustaining beauty of fine wax.

KEEPS THAT "JUST WAXED" LOOK FOR WEEK AFTER WEEK

NOW YOUR FLOORS CAN LOOK LIKE YOU ALWAYS WISHED DEEP RICH GLOSS WITH NO SLIP

HIGH INITIAL LUSTRE—Resists black heel marks, scuffing and scratching. Friction marks that do show will buff out easily, or add small amount of Foremost 3008 to final rinse water to restore gloss and film integrity. Slip-resistant safety for new or old—wet or dry floors.

DIRT-RESISTANT, HARD WATER-RESISTANT—Does not let dirt penetrate. Easily and economically kept clean by sweeping or damp mopping. Gives long lasting service even under heavy traffic conditions. No powdering or tracking.

MIRROR CLEAN—NON-YELLOWING—Can be readily stripped when desired, but seldom necessary. Simply clean and recoat. Ideal for light colored vinyls. No ugly yellow build-up to mar beauty. Traffic lanes may be spot coated, Foremost 3008 will blend in.

NOTE: DO NOT APPLY TO NEWLY PAINTED FLOORS. Paint must be allowed to cure completely prior to application of FM 3008.

ECONOMICAL—Durability, ease of application (just mop on, no lap marks, self leveling), performance and appearance, combined with high solids content make Foremost 3008 the best buy. In many cases this superb floor finish is priced below less desirable products.

— LET'S BE CANDID —

No floor finish (not even steel) can completely resist scuffing and scratching—Most floors simply look progressively worse until recoated—But with Foremost 3008 an occasional light buffing or "gloss-rinse", keeps that "just waxed" look on your floors.

For all types of floors—light or dark—hard or resilient.

RECOMMENDED FOR:

- Vinyl
- Rubber
- Asphalt Tile
- Linoleum
- Terrazzo
- Travertine
- Concrete
- Also Wood and Cork if sealed

TECHNICAL DATA

FOREMOST 3008 FLOOR FINISH-BUFFABLE

Rev. 1-18-19

DESCRIPTION: Foremost 3008 Floor Finish-Buffable is a newly developed synthetic floor coating which provides excellent durability, beauty and protection to floors. It has superior resistance to scuff marks and dirt in addition to providing anti-slip and water resistant features. This outstanding synthetic product offers many advantages over wax-based materials. Foremost 3008 Floor Finish-Buffable contains no wax and therefore dries to its maximum glossy appearance when buffed.

APPLICATION: Foremost 3008-ES Floor Finish-Buffable is recommended for treating the following types of floor: linoleum, vinyl tile, asphalt tile, cork tile, rubber tile, wood floors.

Typical Coverage: 350 square feet per gallon depending on method of application.

NOTE: Wood floors should be maintained with Foremost 3008 Floor Finish-Buffable only when the floor is thoroughly sealed so that the surface is water and alkali proof before application.

NOTE: DO NOT APPLY TO NEWLY PAINTED FLOORS. Paint must be allowed to cure completely prior to application of FM 3008.

DIRECTIONS: Always clean floors thoroughly and strip old wax of finish from floor. A minimum of two coats should be used on freshly cleaned floor surfaces. After dry, floors should be buffed to bring out maximum gloss.

Initial application and continued maintenance with Foremost 3008 Floor Finish-Buffable is the same as the procedure that is used with high quality waxes. After heavy traffic, the surface appearance can be improvised by re-buffing, if desired.

NOTE: Keep from freezing.

PRECAUTIONS: **KEEP OUT OF REACH OF CHILDREN.** May cause eye and skin irritation. Avoid contact with eyes and prolonged contact with skin. Wash thoroughly after handling. Do not take internally.

FIRST AID: EYES: In case of contact with eyes, flush immediately with plenty of water for at least 15 minutes. **SKIN:** Flush with plenty of water. Get medical attention if irritation persists. Wash contaminated clothing before reuse.

Before using this product read the Safety Data Sheet (SDS) for more detailed information regarding safe handling.

FACTS

1. Recovery from traffic
2. Water resistance
3. Removability
4. Patchability

BENEFITS

1. Lightly buff trafficked areas or maintain by adding one or two quarts to final rinse water
2. Hard film resists dirt, etc.; excellent resistance to all kinds of traffic pressure
3. Excellent, resists wet traffic, beautiful recovery with damp-mopping
4. Typical wax strippers quickly remove finish
5. Easily patched in traffic lanes
