

**8300                      8301**  
**HYDROMETER    TITRATION KIT**

**SPECIALTIES FOR MAINTENANCE AND SANITATION SINCE 1947**

**TO BE SURE  
YOU ARE RIGHT!**

**FOREMOST 8300 HYDROMETER**

Foremost 8300 Hydrometer is a scientific instrument for measuring the specific gravity, or density, of alkaline hot vat cleaning compounds. Measures density of solution being tested which is interpreted in ounces of cleaning compound present in each gallon of water or solution. For use with all Foremost hot vat compounds. (Chart included for interpretation.)

**Recommended for use with:** 10A, 10B, 15, 34, 45, 49, 71, 1095, 1190, 1193, 1194 and 1195.

**FOREMOST 8301 TITRATION KIT  
(SPECIFY PRODUCT)**

Chemical titration kit designed to determine close concentration strengths of cleaning solutions in water. Complete directions inside each kit. Most common products with which the titration kit is used are: FM-10, FM-32, FM-33, FM 35-ES and FM-1195. Additional re-supply of standard titrating solution for the kits may be obtained through the Technical Department. **IMPORTANT!** When requesting titration kits always specify which product is involved.

**Recommended for use with:** 10, 15, 45, 49, 32, 33, 34, 35-ES, 40, 44, 45, 49, 71, 1080, 1081, 1082, 1083, 1090A, 1095, 1133, 1131, 1190, 1193, 1194, 1195, F-22, F-268, F-466, and F-854.
