## **METER-MATIC**

CHEMICAL PROPORTIONING & DISPENSING SYSTEMS

**SPECIALTIES FOR MAINTENANCE AND SANITATION SINCE 1947**

***For Accurate, Fool-Proof, Economical,  
Convenient Chemical Control***

### ***Eliminates Waste, Guesswork, And Carelessness***

#### **QUALITY CONSTRUCTION**

Corrosion resistant components. All chemically-wetted parts are high quality PVC, making the unit safe for acid or caustic solutions and water temperatures up to 160°F.

#### **NON-ELECTRIC; CONVENIENT**

Uses tap water and standard hose connections only. No special plumbing required and may be easily installed with the wall-mounting anchors provided with each unit.

#### **ACCURATE, TAMPER-RESISTANT CONCENTRATION CONTROL**

A series of fourteen color-coded metering tips offers a wide range of accurate water-to-product concentration ratios. The location of the tip in each of the siphon tubes discourages tampering. Instruction for tip selection are included with each unit.

#### **ECONOMY**

Meter-Matic eliminates manual mixing which wastes chemicals and labor. The result is big savings in time and money.

#### **FLEXIBILITY**

Models to suit every need. The low-flow models are especially designed for filling bottles and small containers. Buckets and large reservoirs will fill quickly with the high-flow Meter-Matic units. Models combining both high-flow and low-flow rates are standard and offer greater user versatility.

#### **CONVENIENCE**

On all Meter-Matics, the water inlet and chemical suction tubes may be connected on either side of the unit according to the location of the sink and/or chemical containers. An optional water tap outlet assures these units never tie up the water supply.
