

PRESENTS

WEED KILLERS

EPA REGISTERED

For Complete Weed Control

Delta Foremost Chemical Corp.

SPECIALTIES FOR MAINTENANCE AND SANITATION SINCE 1947

Foremost Weed Killers are non-selective, persistent, general herbicides for all vegetation control. Ecologically and environmentally preferable over old-type weed killers. Much safer for personnel than arsenic-based products.

Residual effect of two-way soil sterilant retards seed germination and kills seed sprouts. Some sterilant benefits can carry over to following seasons.

Fast Effective Control of Undesirable Vegetation

“ALL SEASON” Weed Control

BEFORE TREATMENT

AFTER TREATMENT

- ✓ Complete Soil Sterilization
- ✓ Eliminates Costly Hand Cutting
- ✓ Reduces Fire Hazards
- ✓ Improves Building, Fence Line, And Ground Appearance
- ✓ Reduces Pollen From Undesirable Vegetation
- ✓ Prevents Rodents From Nesting Against Building

Economical To Use . . .

Foremost Weed Killers save time and labor on manual weed control programs. One person with one application replaces a full crew cutting several times during the season. No complicated instructions. No diluting. Simply spray as is. One to five gallons per 1,000 square feet (less for annuals, more for tough perennials).

Foremost weed killers are engineered to be used by casual labor or regular maintenance employees. Unlike other non-selective weed killers, they do not require specially licensed personnel for application. Naturally, directions and cautions should be followed.

Easy To Apply . . .

NO MIXING • READY TO USE
CONVENIENTLY APPLIED WITH FM 8360
ALL PURPOSE SPRAYER,
FM 8355 KNAP PACK SPRAYER,
OR BULK DISPENSING EQUIPMENT.

And Many Other Uses ---

STORAGE YARDS — LOADING DOCKS — GRAND STANDS — TANK FARMS — FIRE BREAKS — UTILITY RIGHT-OF-WAY — AROUND MONUMENTS, SIGNS AND FIRE PLUGS OR ANY NON-CROP AREA WHERE BARE GROUND OR "CHEMICAL TRIMMING" IS DESIRED.

PACKED ECONOMICALLY IN 55 GALLON DRUMS.

Put FOREMOST WEED KILLERS to Work for you this Season!

TECHNICAL DATA

FOREMOST WEED KILLERS

Liquid, non-selective, persistent, general herbicides designed for use where control of most succulent vegetation is desired. Translocation and root absorption of component herbicides produce extensive root kill of weeds, and provide long-term residual control.

APPLICATION

These weed killers can be applied by spraying or sprinkling anytime of the year except when ground is frozen. Best results are obtained shortly after weeds have emerged and developed, but not grown too high. Weeds over 3-4 inches high should be cut down or mowed, for a more permanent kill. Care should be exercised when using around concrete or other masonry surfaces as staining could occur.

Foremost Weed Killers are recommended for non-crop areas such as fence rows, parking lots, storage yards, tank farms, pipelines, industrial plants and other similar areas.

DIRECTIONS

It is a violation of federal law to use these products in a manner inconsistent with their labeling.

They are ready to use as they come from the container and no agitation is required. For treating small areas, a tank-type hand sprayer may be used. For larger areas, apply with standard spray equipment.

For control of such annual and perennial weeds as dandelion, bermuda grass, crab grass, wild carrot, horse tail, bouncing bet and brackenfern, apply at the rate of 3 gallons per 1,000 sq. ft.

Do not apply directly to or permit this product to come in contact with desirable, woody or herbaceous plants or the area where their roots may extend. Avoid spray drift to such plants. Course sprays are less likely to drift. Thoroughly clean spray equipment with a suitable chemical cleaner, such as kerosene, before using for other purposes or do not use for other purposes.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN: Hazards to Humans and Domestic animals. Avoid contact with skin, eyes, and clothing. Wash thoroughly after handling. In case of contact, flush immediately with large amounts of water. For eyes, get medical attention. Remove and wash contaminated clothing before reuse.

These products are toxic to fish and wildlife. Birds and other wildlife in treated areas may be killed. Do not apply where weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes.

Do not discharge effluent containing these products into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing these products to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL HAZARDS: Do not use, pour, spill or store near heat or open flame.
